SMART EYE
SECURITY

عين الحماية الذكية

— COMPANY PROFILE

Where Security Meets Intelligence.

A leading company and a symbol of innovation in the field of providing advanced IT and security solutions.

WWW.SMARTEYESECURITY.NET · JEDDAH · MADINAH · SAUDI ARABIA

WHO WE ARE

A symbol of innovation in IT & security.

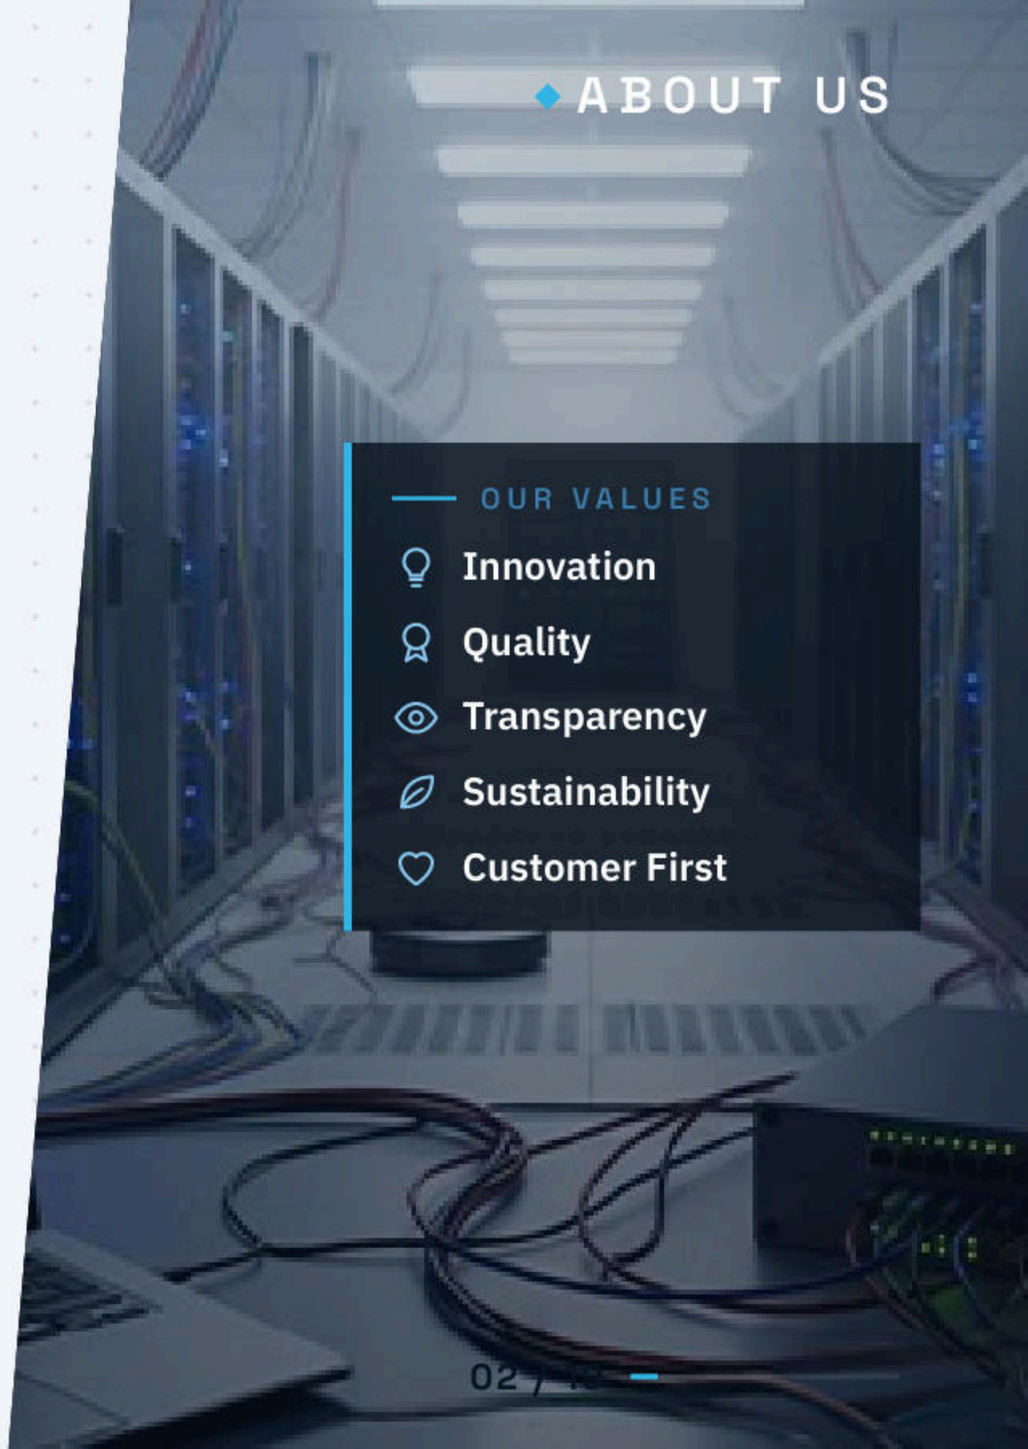

Smart Eye Security is a pioneering company in information technology and security solutions. We began with an ambitious vision to help organizations, institutions and individuals achieve effective digital transformation and keep pace with rapidly accelerating technology. We do not just provide services — we create solutions.

Vision

To be the first choice and a leader in providing integrated, innovative technology and security services — transforming work environments into distinguished, secure digital entities.

Mission

To build long-term strategic partnerships with our clients by delivering professional services to the highest quality standards, using the latest global technologies.

— WHAT WE DELIVER

Our Services

SECURITY & SAFETY

- CCTV Surveillance P.04
- Access Control & RFID P.05
- Time & Attendance P.05
- Metal Detectors & Luggage Inspection P.06
- Fire Alarm Systems P.06

HOSPITALITY

- DND Systems — Wired & Wireless P.08
- Hotel Electronic Locks P.09
- GRMS — Guest Room Management P.10
- Smart Room Systems P.11

SMART BUILDINGS & NETWORKING

- Smart Home Systems P.12
- Smart Intercom P.12
- Parking Management P.13
- Networking P.13
- Central Systems (PBX) P.13

HEALTHCARE

- Nurse Call System P.14

INDUSTRY, COMMUNICATIONS & ENERGY

- Industrial Automation P.15
- Call Center Systems P.16
- Data Centers & Servers P.16
- Solar Energy P.17
- AI Software & Cloud P.17

SECURITY

Surveillance Camera Systems

High-resolution surveillance systems installed to ensure 24/7 monitoring and security for your people, property and operations.

- High-resolution indoor & outdoor cameras
- Live view and playback from mobile or PC
- Reliable recording and secure storage
- Night vision and motion-triggered alerts
- Integration with access control & alarms
- Design, installation and maintenance

Hotels | Healthcare | Residential | Commercial

Today · Check-ins		ILLUSTRATIVE
Employee 01	07:52	On time
Employee 02	07:58	On time
Employee 03	08:14	Late
Employee 04	08:01	On time

Access Control & RFID

Smart electronic systems to manage entry permissions and enhance facility security.

- RFID card, tag and keypad readers
- Fingerprint and face recognition terminals
- Permissions by user, zone and schedule
- Entry logs and audit reports

Time & Attendance

Accurate solutions to track employees' working time using biometric fingerprint and facial recognition.

- Fingerprint and face-based punch-in
- Shift, lateness and overtime reports
- Works alongside access control

Metal Detectors & Luggage Inspection

Highly sensitive devices to secure entrances and raise safety levels.

- Walk-through metal detector gates and hand-held detectors
- X-ray baggage scanners with conveyor belt and inspection trays
- Complete checkpoint set-up for venues, hotels, offices and events

Fire Alarm Systems

Fast-response, early-detection systems to protect lives and property from fire hazards.

- Addressable control panels
- Smoke and heat detectors
- Manual call points, sounders and strobes
- Integration with building systems

02

Hospitality

Guest-room technology, engineered for hotels — privacy, access and room intelligence working as one system.

P.08
DND Systems
Wired & Wireless

P.09
Electronic Locks
For hotel doors

P.10
GRMS
Guest Room Management

P.11
Smart Rooms
Smart room systems

Do Not Disturb (DND) Systems

Guests control their privacy from inside the room, and your team sees every room's status at a glance — in wired and wireless versions.

Wired DND

Cabled network for stable, always-on operation. The right choice for new builds and full renovations.

- Stable, dedicated cabling
- Ideal for new builds & renovation

Outside the door | Inside the room

Wireless DND

No additional cabling for fast, clean installation. Ideal for operating hotels and retrofit projects.

- No new cabling required
- Fast room-by-room rollout

Outside the door | Inside the room

- ✓ Outside-door indicator: DND / Make-Up-Room
- ✓ Doorbell and in-room control panel
- ✓ Central status at reception & housekeeping
- ✓ Integrates with the GRMS platform

HOSPITALITY

Hotel Electronic Locks

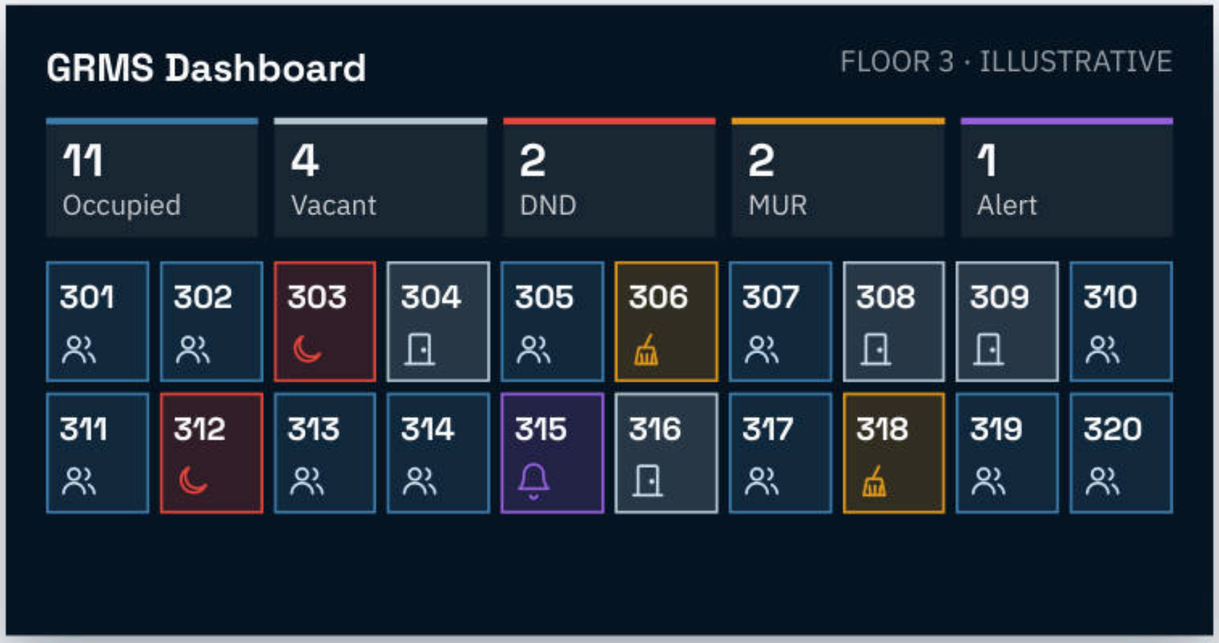

Advanced smart locks that control doors with ease while delivering the highest levels of protection — convenient for guests, controlled for operators.

- RFID guest cards, programmed at the front desk
- Staff, floor and master key levels
- Audit trail of every door event
- Battery-level monitoring and alerts
- Emergency override for safe access
- Links with GRMS and hotel management software

Check-in → Encode card → Tap to enter → Auto-expire

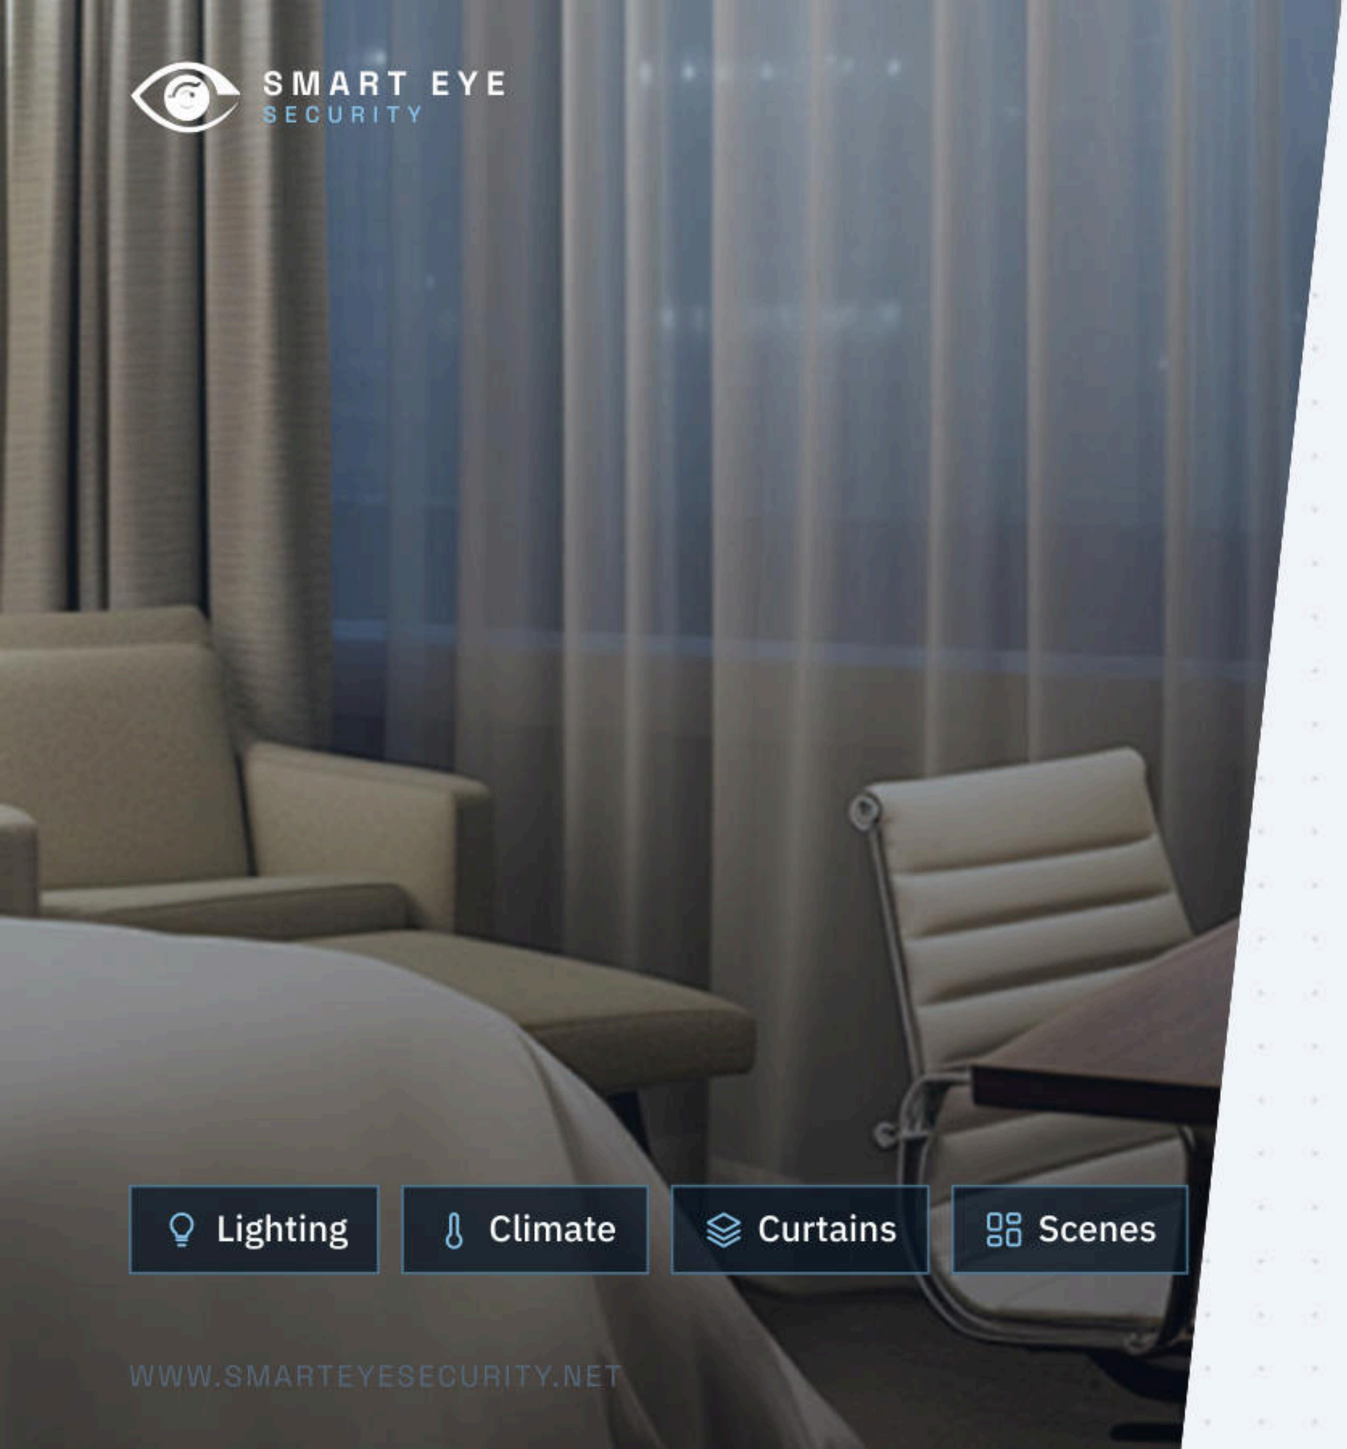

Guest Room Management System (GRMS)

One platform to control, monitor and automate every guest room — improving comfort, cutting energy use and giving every department live visibility.

- Lighting & scenes
- AC / thermostat control
- Occupancy-based energy saving
- DND / MUR status
- Door & lock status
- Alerts & maintenance

In-room devices → Room controller → GRMS server → Staff dashboards

HOSPITALITY

Smart Room Systems

Automated control systems that turn hotel guest rooms into smart environments for comfort and security.

- Lighting and scene control
- Curtain automation
- Air-conditioning and climate control
- Touch panels, tablet and voice control
- Door, window and motion sensors
- Works with GRMS, locks and DND

Smart Home Systems

Turning homes into smart environments built on automated control systems for comfort and security.

- Lighting, climate and scene control
- Door, window and motion sensors
- Control from wall panel, phone or voice
- Integrated with cameras and alarms

Smart Intercom

Video door stations that let you see, speak to and admit visitors — from the door, indoors or remotely.

- Video and audio visitor verification
- Door release from indoor unit or phone
- For villas, towers, hotels and offices

Parking Management Systems

Smart solutions that organize and manage parking easily and smoothly.

- Barrier gates with card or remote entry
- Entry / exit logging and reporting

Networking

Building a strong infrastructure that speeds up data transfer, with the highest security standards.

- Structured cabling, switching and Wi-Fi
- Secure, segmented, scalable design

Central Systems (PBX)

Centralized communication solutions for effective, smooth internal and external connectivity.

- IP and digital PBX with desk phones

MEDICAL SYSTEMS

Nurse Call System

Instant two-way communication between patients and nursing staff, with every call routed to the right team and recorded.

- Medical system over an IP network — no special cabling required
- Bedside call units and corridor dome lights
- Two-way voice and instant alerts at the nurse station and on staff devices

Patient call → Nurse station → Staff alert → Logged

INDUSTRIAL

Industrial Automation

Smart Eye empowers your industrial operations with next-generation automation and digitization solutions. Automate your entire operation — from production lines and PLC systems to CNC machines, industrial robots and MES systems.

Control Systems Design & Implementation

- End-to-end control system design and deployment
- DCS and SCADA systems
- Programming and commissioning of PLCs

Industrial Monitoring & Data Analytics

- IoT implementation
- Real-time data collection and visualization
- Predictive maintenance and anomaly detection
- OEE tracking to identify production losses

System Integration

- Integration of machines, sensors and control units
- Unifying operational data from different sources
- MES (Manufacturing Execution Systems)
- Integration with ERP systems

Cloud Connectivity & Remote Access

- Remote diagnostics and troubleshooting

Industrial Robotic Arms & Production Line Automation

Artificial Intelligence (AI) Applications

Digital Twin Technology

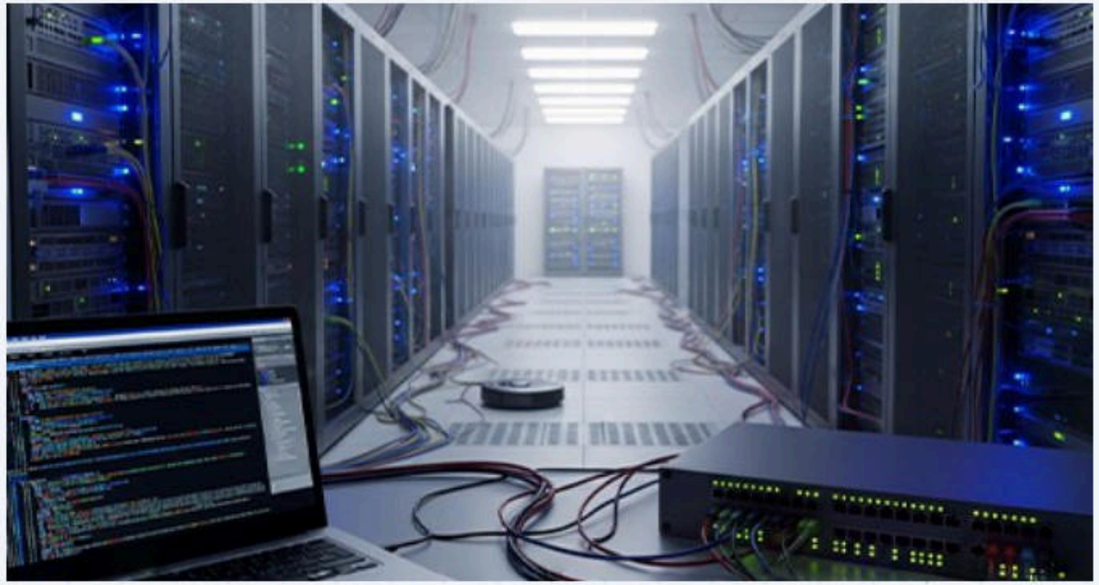

Software Development

Call Center Systems

Professional systems to manage calls efficiently and improve the customer experience.

- Call routing, queues and recording
- Live monitoring and performance reports

Data Centers & Servers

Designing integrated data centers and supplying advanced servers that fit your business size.

- Design, supply and installation

Solar Energy

Clean energy systems that power your facilities and reduce operating costs.

- Solar panel supply and installation
- Sized to your facility's load
- Lower running costs, sustainable growth

AI-Supported Software & Cloud

Software supported by artificial intelligence and cloud platforms — making your systems smarter and easier to manage.

- Smart analytics and automation
- Cloud access from anywhere
- Custom software for your workflow

TRUSTED PARTNERS

Our Clients

Organizations across hospitality, healthcare, education and real estate rely on Smart Eye Security.
